Tuberculosis - A Disease of

Adults. Every year more than 6,500 persons die in the State of Ohio from tuberculosis. About ninety per cent. of these persons are adults. The great majority of these persons are married and their untimely deaths mean dependent families to be cared for by the state. The loss in money is enormous, but who can measure the amount of suffering

caused by the disease. Let us, rather remember the sorrow, the tears and anguish which would be spared to thousands could we save these men and women in the prime of life, and retain them as the supporters of their families and as bread-winners in the community.

The prospective appointment of Judge William Hook to succeed Justice Harlan, mposes an important duty on every U. S. Senator who is not owned body and soul by monopolistic interests. If more than one-third of the Senate is free from trust domination, then the appointment will not be confirmed. It is bad enough that there are eight trust judges on the Supreme bench now, without putting on a ninth one, and making it unanimous.

Louis D. Brandeis, the famous Boston lawyer, who looks, acts, walks, and talks like Abraham Lincoln, while testifying before the Senate trust investigating committee, showed how the trusts receiving the greatest protection have destroyed trades unionism, reduced wages, increased working hours, and driven Americans out and brought foreign immigrant labor into their mills. He exposed the injustice and futility of the Tobacco Trust settlement, effected by the United States Supreme Court, and said the rule laid down amounted to this: "What man has illegally joined to-

gether, let no court put asunder."
